MERCHANTS PICNIC DRAWS LARGE CROWD CHILDREN

On Wednesday afternoon of last week the business men and citizens of Didsbury held their second annual picnic at the fair grounds. Approximately 700 were present the majority of which were children. Most of the schools in the district awarded the pupils a half holiday which was much appreciated by the committee in charge.

The afternoon program commenced with dodge ball in which young and old joined. Foot and novelty races followed. In many of the races for the younger generation thirty and forty competed which made it difficult for the judges to pick the winners.

The busiest men on the grounds were those in the booth handing out ice cream and lemonade. Many youngsters had as many as fifteen cones.

Next year the picnic will be held on July 1.

The only change of the C.P.R. time table on the C and E. line is the evening train going north. Starting Sunday this train will arrive in Didsbury at 4.22 p.m. instead of 6.15 p.m.

Found On Our Desk

Dear Sirs:

I thank you very much for the picnic you gave us on Wednesday. For once I had all the ice cream I wanted. The lemonade was swell and the picture show also.

Yours truly,
Jack Becker

CARD OF THANKS

Mr. and Mrs. Haulan Walsh and family wish to express their thanks to the neighbors and others who assisted at the fire which destroyed their home Wednesday afternoon last and also to those who have since shown kindnesses.

LOCAL & GENERAL

Mr. and Mrs. Cecil Stutler were visitors to Calgary yesterday.

Shooting of Hungarian partridge opens on Tuesday Oct. 1st.

The Women's Sewing Circle of the Bergholm Mennonite Church east of Didsbury wish to announce that they are holding a bazaar of miscellaneous articles, on Saturday Oct. 5th, at 2 p.m. at the church. It will also be of interest to know that the returns will be given to Home and Foreign mission work.

The term of the 17th Legislature of Ontario has come to an end, and

BOWDEN MARKET CONTROVERSY

For some considerable time the price of grain at Bowden has been from 4 to 9 cents higher than at other points along the line.

This condition we understand was due to a war between two of the companies. As a consequence much of the grain of Penhold, Innisfail, Olds and Didsbury was being hauled to Bowden.

A protest was lodged and we are advised that on Tuesday (last) it was finally settled; in future the price of grain at Bowden will be in conformity with the market prices as based on the markets throughout the west.

Farmers in our district will receive the same price at Innisfail as at Bowden.

A war such as has been going on was working out to the advantage of the farmers, but was causing considerable discontent and suspicion of the buyers at other points. So that the Grain Companies had to get the matter cleared up.

The local buyers will all be pleased that the war is over and a peace signed. Business will once more take its natural course.—Innisfail Province.

The Ferguson government will face the electors at the polls for the 2nd time on October 30. Much interest will be taken in this election all over the Dominion, the liquor question being an outstanding issue.

Miss Muriene Stogstad spent the week end in Calgary, returning Monday morning.

Mr. E. O. Waite was called to Woodstock, Ont., on Tuesday, on account of the illness of his mother.

Mr. John A. Smith, inspector of high schools, paid an official visit to Didsbury on Thursday and Friday of last week.

Mr. G. Alden who has been visiting friends in Didsbury and district returned to her home in Portland, Ill., on Tuesday.

Gray Sharp left Tuesday morning for Edmonton where he will enter the University of Alberta, taking the electrical engineering course.

The Calgary fall stock shows and sales will be held in the exhibition grounds, Calgary, Nov. 1 to 6. Sale entries close October 5. Show entries close October 26. In addition, there will be the boys and girls lamb and pig feeding competitions.

Farewell Surprise!

The Ev. Sunday School gave a "surprise" at the home of Mrs. A. C. Fisher last Thursday evening in honor of the latter's sister, Miss Anna Mueller, who is leaving shortly for Portland, Oregon, where she intends taking a course of religious education in the North Pacific Evangelistic Institute.

Immediately after the arrival of the group at the Fisher home, a brief but spicy program was rendered consisting of vocal and instrumental music, also readings and speeches illuminated with numerous flashes of wit and humor. These were followed by the presentation of a beautiful leather Aero-pack travelling case.

Miss Mueller has resided in this district for a good many years and has been associated with the various branches of the Evangelical Church, as exemplary president of the Young Peoples Christian Endeavor organization, a Sunday School teacher, a loyal member of the choir and of the Young Women's Missionary Circle. She leaves a host of friends and neighbors in Didsbury, who will watch her progress with no little amount of interest.

Schedule Of Events

Track Meet Here -- October 4

Final preparations for the Field Day of public and high-schools from Innisfail to Crossfield, inclusive, are being made and with favorable weather, Friday, October 4 will be a memorable day in the athletic history of the schools.

The following schedule of events comprises the list of sports to be run with the exact time which they will take place. Results of baseball and basketball games played during May and June of this year were: Baseball: Olds 1, Didsbury 2, Innisfail 3; Basketball: Bowden 1, Carstairs 2, Didsbury 3.

In the track and field events each school is allowed two contestants for each event. The winners in each event will be given red, blue and white ribbons for first, second and third place, respectively. They will also be credited with five, three and one point for those respective places in the races. The winners in each of the five classes will be given gold, silver and bronze medals for highest, second and third number of points.

A fund was started to purchase a cup to be competed for annually, by the proceeds from the field day at Olds last year. If \$25.00 can be raised above expenses this year, the cup will be procured and presented to the school obtaining the highest aggregate of points.

Each School Board is asked to contribute \$10.00 toward the expenses of the meet.

The Didsbury pupils are showing promise of some material that will be hard to beat in their respective classes, so this event will be of particular interest to Didsburyites.

A small admission to the exhibition grounds will be charged adults to help defray expenses.

FOUR HUNGARY MAIDENS

Four New Canadians from Hungary whose native dances delighted thousands in attendance at the Regina Festival

From whatever viewpoint it is to be judged, the Great West Canadian Festival recently brought to a conclusion at Regina, was a success. In attendance it eclipsed its forerunner at Winnipeg last year. Its handicraft exhibit covered a wider range, a more comprehensive representation of the peoples of the West had been arranged for and, in the words of J. M. Gibbon, sponsor of the festival, "Saskatchewan has proved that within its borders is the foundation of an art upon which will be built a structure of national culture finer than that of any other nation on earth." Over a hundred folk-dancers interpreted the dances of many racial groups. Folk-singers numbered over one hundred and sixty. Handicrafts struck response from thousands and it is safe to say that next year's festival, which is already being planned, will receive still greater support and present a folk-pageant to be unequalled on the continent. The festivals have been arranged under the auspices of the Canadian Pacific Railway.

"WHERE QUALITY AND PRICE MEET"

Britain and Canada

Canada is honored at the present time by having among its visitors three notable British statesmen, Hon. J. H. Thomas, Minister of Employment in the Ramsay MacDonald Government; Hon. Winston S. Churchill, former Chancellor of the Exchequer, and Mr. Amery, former Minister for the Dominions. Mr. Churchill and Mr. Amery are in Canada on holiday, but they are none the less closely studying conditions and ascertaining the sentiment of this country in regard to vital questions of Empire policy such as immigration, trade and commerce, and the possibilities of closer relationships in matters for the general advancement of both Mother Country and this Dominion.

On the other hand, Mr. Thomas' visit to Canada is made in his official capacity as Minister of Employment with the object of endeavoring to find out in what ways Canada can assist in solving the serious unemployment problem in Britain without doing injury to itself, and, having discovered, or evolved, ways and means to accomplish this object, to secure the co-operation of the Canadian Government and the Canadian people in carrying them into effect.

Fortunately, the first impression created by Mr. Thomas' mission has been removed. As the minister charged with the task of solving the unemployment problem in Britain, it was felt that Mr. Thomas was coming to Canada with the idea of developing some immigration policy whereby large numbers of British unemployed would be transferred to this Dominion. Anxious as Canada may be to have a large proportion of its incoming settlers of British birth, this Dominion is not prepared to have thousands of men dumped into the country solely because they cannot find work at home and who have no training or aptitude for life in this land. Mr. Thomas has made it abundantly clear that he has no such intention; on the contrary, Mr. Thomas declares: "It is not my aim to solve my unemployment problem by creating one for you." Unemployment and immigration are, he says, two quite separate and distinct problems and should be tackled as such.

Then what is Mr. Thomas' proposal to Canada? It is simple, clear-cut, workable, and one that should find favor with, and the sympathetic support of the people of Canada. In a word it is that our large Canadian corporations, and our people generally, should, when making purchases buy British-made goods and articles, if such are not made in Canada, in preference to buying from any other country. He has asked the Dominion Government to give encouragement and support to such a policy. He has sat down in conference with the heads of the Canadian Pacific and Canadian National Railways and asked them to follow such a policy. He has said to the officials of the Canadian Wheat Pool: "Britain is the largest purchaser of your wheat. We are your best customer, just as we are Canada's best customer. Thus, when you require machinery or other things which Canada itself does not manufacture and cannot supply, we ask you to buy from us, rather than from others."

This should appeal to the people of Canada as good business. It is a self-respecting proposal for both parties to it. For example, Mr. Thomas points out that Canada imports over 16,000,000 tons of coal from the United States. He wants, and says he is going to get, some of that coal business for Britain—Canada's best customer,—and thereby assist the coal mining industry of the Old Land and supply work for some of the thousands of unemployed miners there, as well as cargoes for British boats, thus providing employment for British dock hands, sailors, and all and sundry having to do with the business of shipping.

Such a policy will strike a responsive chord with the people of Western Canada, who are not particularly favourable to any policy of restrictive tariffs, or other forms of restraint on trade, and who firmly believe that the proper policy for this Dominion to pursue is to offset tariff action by other countries against Canada by further reducing tariffs on British goods and thereby assisting to substitute British-made goods for those of other countries.

The success of such a policy lies largely with the individual Canadian citizen. He can make it a success by stipulating when making any purchase that, first, he must have an article made in Canada, and, if that cannot be obtained, second, that it be British-made. Importers, wholesalers, distributors, retailers, will quickly adjust their stocks to comply with the popular demand.

Leaving all sentiment aside, it is good business for the people of Canada to support and buy from their best customer. The more we buy from Britain, the more Britain can afford to buy from us.

An Indian spider's web, only six inches wide, was found to contain over 41,000 meshes.

Stop Sneezing

Nip that cold in the bud with Minard's Heat and Inhale.

W. N. U. 1802

Southern Alberta Beet Crop

"The Southern Alberta beet crop, from present indications, especially from the Raymond District, promises to be the largest tonnage on record," says the Lethbridge Herald, "despite the reduction in acreage due to loss from heavy rains and floods during the early spring. The remarkable growth helps to offset the difference, and the beets thrived under the oppressive heat of midsummer."

A new type of lifeboat, recently tested in British waters, holds 300 passengers and is equipped with radio.

Any job is easy when you like it and hard when you dislike it.

Was Victim Of Glacier

Body Of Austrian Recovered After Eighty-Three Years

Eighty-three years ago, Norbert Mattersberger, at the time 32 years old, husband of Magda, and father of Franz Otto, failed to return to his cottage, in the village of Kals, Austria, one day from the woods, where he won his living hunting game. A rescue party from the village decided he had been caught in an avalanche of ice.

Recently Mattersberger came home just as he left that day in 1846. The glacier had given up its prey. Although clean shaven, according to family records, when he left, he had a two-inch beard when a party of hunters found him on the edge of the glacier. The body, clothes, and weapons were in a perfect state of preservation.

Franz Mattersberger is now 86. His father was buried at Kals, while grandchildren and great-grandchildren mourned at his grave.

WHAT OUR GIRLS NEED

When Languid, Anaemic and Feeling Run Down

When a girl grows languid, dull and irritable, when her color fades and she becomes pale, you may be sure that the cause is anaemia, or impoverished blood. The bright, red color of the blood is caused by the presence in it of millions of tiny red corpuscles. It is these tiny bodies that carry nourishment from the blood to the tissues. They also cause the glow of health in cheeks and lips. When a girl's blood is deficient in these red corpuscles her body is under-nourished, her nerves starved, and there is serious danger of a decline. What is needed is an improvement in the quality of the blood, and it is a scientific fact that a course of Dr. Williams' Pink Pills will so enrich and purify the blood that all traces of anaemia and its accompanying weaknesses will disappear. As an evidence of the value of Dr. Williams' Pink Pills in cases of this kind, Mrs. John Finlin, Howland Station, P.E.I., says:—"I am glad to take this opportunity of recommending Dr. Williams' Pink Pills. My daughter was in a badly run down condition; very pale, nervous and much under weight. We tried several medicines, but they did not seem to do her any good, so I decided to give her Dr. Williams' Pink Pills. Almost from the start she began to improve, and after the use of a few boxes she had gained in weight, her appetite improved and she had a better color in her cheeks—in fact she had fully regained her former good health. I would advise every mother of young girls to give them Dr. Williams' Pink Pills at the first sign of an anaemic condition." You can get these pills from any medicine dealer or by mail at 50c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Germany, the United States, the United Kingdom and France together, exported \$800,000,000 worth of chemicals and allied products in 1928.

Worms in children work havoc. These pests attack the tender lining of the intestines and if left to pursue their ravages undisturbed, will ultimately perforate the wall, because these worms are of the hook variety that cling to and feed upon the interior surfaces. Miller's Worm Powders will not only exterminate these worms, of whatever variety, but will serve to repair the injury they have done.

Chinese writers state that in the third century B.C., China had wide highways lined with shade trees spaced at intervals of thirty feet.

Cramps Diarrhoea Pains in Stomach

Mr. Roy Lighthall, Milford, Ont., writes:—"I became very ill; lost my appetite, had cramps, diarrhoea, and severe pains in my stomach."

"I purchased a bottle of and before I had taken half of it I was completely relieved, and have had no symptoms of the trouble since."

"I cannot praise 'The Extract' too highly, and will never be without a bottle of it in the house."

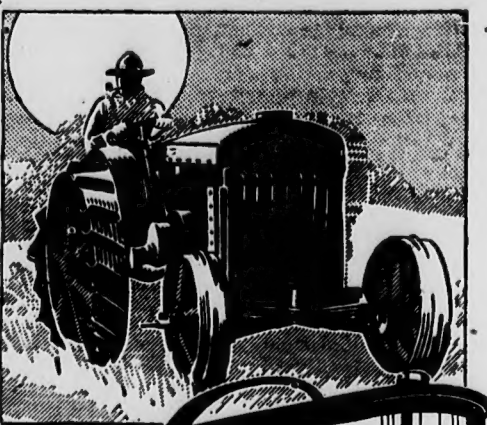

"It is pleasant to take and acts very quickly."

"My brother had the same experience with it as I had."

"Dr. Fowler's has been on the market for the past 84 years; you don't experiment when you buy it. Price 50 cents a bottle at all dealers; put up only by The T. Milburn Co., Ltd., Toronto, Ont."

New Company Organized

Will Manufacture Briquettes From Dried Coal In Souris District

The Canadian Coal Briquettes & Power, Ltd., has been organized by a number of prominent financiers and coal men in western Canada to manufacture briquettes from the dried raw coal of the Souris District of southern Saskatchewan. Dried lignite coal and powdered fuel will also be manufactured. The Company, it is stated, owns 800 acres of coal in the Souris District with an estimated tonnage of 8,000,000 tons.

Miss Oldsilver: If I should lose all my money would you love me just the same?

Mr. Seadhunter: Just the same, my dear, only I'd be so busy earning my living you wouldn't be able to notice it.

Kill that corn with Minard's Liniment.

World Harvest Larger

Wheat Acreage in Many Countries Increased in Last Year

Present indications are that the world acreage of wheat to be harvested in the season 1929-30 will be larger than that of last year. The 1929 wheat acreage in 21 countries is estimated to be five million acres larger than in 1928. Areas reported in all European countries total 56,562,000 acres, an increase of 1.4 per cent. over last year.

Vision of Mineral Wealth of Western Provinces Is Seen From Initial Development

Speaking of the immense possibilities of the northern parts of the provinces of Quebec, Ontario, Manitoba and Saskatchewan in the production of mineral wealth, Dr. C. V. Corliss, in an address to the Winnipeg Board of Trade, recently stated that Canada would never be appreciated until the people learned to turn their eyes to the north, for it is there that they will find the largest quantities of that without which the progress of civilization would be sadly hampered, if not halted altogether, namely minerals.

Minerals form the basis of progress today, for the material side of our modern scientific civilization depends for its progress on man's increasing knowledge and skill in their use. And so the strength and economic success of modern nations are largely conditioned on their successful exploitation of mineral wealth. The world's growth in population may be controlled by its biotic resources, man must be fed and clothed before he may advance, but its material progress is measured rather by man's growing success in shaping its mineral resources into forms to suit his own purpose.

With the opening of the vast mineral-producing areas in the northern part of Manitoba and Saskatchewan, though the work has only been begun, comes a partial realization of the potential wealth contained in these two provinces in districts hitherto thought to be of little value beyond the timber and furs. The discovery of the presence of mineral-bearing formations in the rock gives promise of another mining area such as has been developed in Northern Ontario.

Nothing could bring greater benefit to the agricultural industry of the West than the development of a flourishing mineral industry, with its large sums of circulating capital, energising the economic system in all directions. Such sound development would provide a ready near-by demand for the products of the farmer, who is now so seriously hampered both by the remoteness of his market and by the limited variety of those products which can stand the present long transportation cost.

Nor would anything quicken the activities of western towns and cities more than the opportunity to supply the many other needs of a flourishing mineral industry and of its numerous workmen and staffs, who, unlike the farmer must purchase one hundred per cent of their daily needs. This country's greatest economic need today is more balanced industries, the creation of internal exchange of goods by the development of more varied industries, a happy condition which will never be fully enjoyed until there is set in motion a long chain of industries having their starting point in the minerals of the earth's crust.

As in the case of Northern Ontario, some of whose greatest mineral deposits were discovered only when the railroad was being pushed through, the wilderness railway system in the northern parts of Manitoba and Saskatchewan is leading to the discovery of still further deposits of potential wealth some of which are already being converted into actual cash by those in charge of the development. Then, too, the more the lines of steel are pushed ahead in this country, the

more of it is made readily accessible to the prospector and still more accessible to that just as important person, or persons, the promoter who develops what the prospector has found.

Before the end of 1928 an eighty-eight mile branch railway, which was essential for the development of the area, was completed from the Hudson Bay Railway. The mine plant under course of construction and which will take about four years to complete, will include flotation mill, with cyanide annex, copper smelter and electrolytic zinc plant. It is expected to mine and treat 3,000 tons of ore a day. Hydro-electric plants and transmission lines will also be erected and it has been announced that the Island Falls site on Churchill River will be utilized.

In 1915 on the north-west arm of Schist Lake, and about four miles south-east of Flin Flon Lake another discovery was made. A year later diamond drilling disclosed an ore body of about 25,000 tons of massive chalcocite-pyrite, averaging about 20 per cent. copper with additional gold and silver values of \$5 a ton, and about 180,000 tons of lower grade copper-zinc sulphide ore. Very soon after its discovery, this property was taken over by a company. During the war years this company took advantage of the high price of copper and the richest part of the ore was accordingly mined out and shipped to smelter at Trail, British Columbia, for treatment. Although involving unusual transportation costs, 25,000 tons were moved from 1917 to 1920 inclusive. The value of this copper exceeded \$2,000,000, and the recovered gold and silver approached a large figure.

Prospectors in 1914, working eastward from Amisk Lake and westward from Hudson Bay Railway, found many indications of free gold in quartz veins occurring on the shores of Wekusko Lake, also known as Herb Lake. Hundreds of claims were staked and considerable development resulted. Number of companies were formed.

Many important discoveries of minerals in all parts of this great belt have followed the spreading out of the prospectors and scarcely a day goes by without a new discovery. One of the biggest, or possibly the biggest ore body yet found, is the Sherritt-Gordon copper-zinc deposit on Cold Lake, otherwise known as Kississing Lake, about forty miles north-east of Flin Flon Lake.

Development to date has definitely placed this property in the big mine class and an off-shoot of the Flin Flon branch railway is expected to be constructed during this year from Cranberry Portage to the mine, a distance of about forty-two miles. Arrangements for the construction of a 1,500 ton concentrator were recently announced which, it is expected, will be ready for operation by January, 1931. Production from the Sherritt-Gordon is only a matter of time, a strong company having been formed to carry out the developments.

So the justified rush to the North has opened up an area which seeks the hand of friendship from the South.

China Planning Gunboats

The Observer's Shanghai correspondent, in London, reports that British firms are negotiating with the Chinese Government for the construction of gunboats costing several millions of dollars. Although the negotiations have not been completed, it has been arranged for eight Chinese cadets to go to Great Britain to receive instruction in naval architecture.

Planning Another Flight

Another Graf Zeppelin flight to America is planned for October, according to a Friedrichshafen despatch to the Telegraph Union. The despatch added that the great dirigible was expected to return to Friedrichshafen on Sept. 10.

He: "Don't go. You are leaving me entirely without reason."
She: "I always leave things as I find them."

"Shall we try what honesty will do in our business?"
"No, I will have no more innovations." Lustige Kiste, Leipzig.

W. N. 11. 1802

Canada Urged To Look After Forests

Method Is Criticized By Editor Of Empire Journal

A strong indictment of the forestry methods used in Canada is made in an issue of the "Empire Forestry Journal" by Fraser Story, the editor. After referring to the ever-growing needs of the Empire for soft woods, the writer points out the magnificent white pine forests of Eastern Canada are gone and the lumber industry is now concentrating on the great forests of the West. "The treatment of old stands and the neglect and abuse of young growth, in spite of the efforts of the forestry service, the absence of care in the abstraction of produce and the large percentage of waste come as a shock to European forestry," he writes.

"Generally speaking," he continues, "no effort is made to restock cleared areas with profitable species. During logging operations all valuable conifers are removed while fire nearly always breaks out in the debris and burns any that remain."

"Valuable coniferous forests are succeeded by practically worthless trees, which are in their nature weeds. What makes matters worse is the tendency to cut down young trees for quick sale."

"The lack of regard for future crops seems to be principally due to thoughtlessness. Canada will, no doubt, always have a sufficient supply of soft woods to satisfy her own needs, but as an Empire supply she is a failing source."

Will Develop Amber Deposits

Amber and Ochre Beds in Northern Manitoba To Be Worked

A new branch of mining in northern Manitoba is a likelihood next spring with the announcement that a syndicate will develop the ochre and amber deposits at Cedar Lake. The company is known as the Charland Syndicate, and operations are expected to start this winter.

Staking of properties will be completed by this fall. Adequate finances are in sight for the development, it is stated by officials of the company.

Delay in operations has been caused by the fact that there are no regulations governing the dredging of amber. It is understood that the syndicate is progressing satisfactorily in its negotiations with the authorities and that dredging licenses will be granted.

Surveys have shown that the major part of the bed of Cedar Lake is composed of an amber deposit, the result of the decay of an ancient forest. A paint and varnish firm in the United States has been investigating the possibilities of the ochre deposit, and a deal for the sale of the output in northern Manitoba is probable.

That Kind Of A Loan

"A Kathleen Mayounne loan?" questioned a judge in an Irish court. "What in the world is that?" "That's what we call some loans in our parts," the witness replied. "They are the 'it may be for years and it may be for ever' sort."

Plans Being Formulated For Canada's Participation In The Antwerp International Exhibition

Air Mail For North

Regular Service To Be Established In Northern Alberta

A notable extension to Canada's rapidly growing air mail services will go into operation early in November, when regular air mail service will be inaugurated by Postmaster-General P. J. Veniot, between Fort McMurray, Alberta, and Aklavik, N.W.T., near the mouth of the MacKenzie River.

This route, which will almost parallel the historic fur traders' trail for nearly 2,000 miles north and northeast, along the Athabasca, Slave and MacKenzie Rivers, penetrates farther north than any other regular air mail service in the world and brings a remote but important region of Canada's vast north land close to the main arteries of traffic, also greatly increasing the frequency of communication. The winter transportation difficulties in this area have been such that it has been necessary to depend chiefly upon dog teams for mail services. The coming of the mail plane reduces days to hours and confers an inestimable benefit on the inhabitants. There will be 14 points of call on the route, including Fort Resolution, Fort Providence, Fort Good Hope and Aklavik itself.

Sweep Of Prizes

Carload Of Manitoba Livestock Sets a Record At Western Fairs

The greatest sweep of prizes ever made by a carload of livestock from Manitoba, is the records set by Alex McPhail and Herb Clark, of Brandon, in their showing of swine over the Western Canada circuit of exhibitions. Concluding their trip at Regina, the local exhibitors found themselves in possession of 83 firsts. Forty-three animals were included in their showing, and at Calgary, Edmonton, Saskatoon, Regina and Brandon, they met keen competition but were successful in practically every event they entered.

Combines Used In B.C.

While "combines" for harvesting are common enough on the Prairies, the first one to be used in British Columbia will be in the fields of the L and A Ranch this season, between Armstrong and Vernon. Considerable acreage was sown to wheat this year, and being irrigated land it has not suffered from the drought and will likely yield from 45 to 50 bushels to the acre.

A Lonely Town

The loneliest village in England is in Oxfordshire. This town is only five miles from Oxford, yet its many agricultural inhabitants have never seen a train and few have attempted a tortuous trip into civilization. Because of its isolation, supplies cost the local villagers much more than they should.

Win Scholarships

Canadian Pacific Railway scholarships covering five years' tuition at McGill University, have been awarded to C. P. Sturdee (left), son of E. F. L. Sturdee, assistant general passenger agent; and William P. Dunlop, son of John Dunlop, in the pension department of the railway. These young men have both done brilliant work in their respective school careers and closed them by making the highest average in the matriculation examination for entrance to the university. As minor sons of C.P.R. employees they won the right to the scholarships awarded them.

Plans are now being formulated for Canada's participation on a princely scale in the Antwerp International Trade Exhibition of 1930, which will be the fourth occasion on which Canada has taken part in a leading Belgian Exhibition.

The three previous occasions were at Liege, in 1905, Brussels, in 1910, and Ghent, in 1913. Until recently it was thought that Canada would take a space in the British pavilion at Antwerp, but so important is Canada's growing trade on the Continent becoming, that the Canadian Government decided on participation separate from the British exhibit and in an entirely Canadian Pavilion.

This has been designed by J. O. Turcotte, Canadian Government Exhibition Commissioner, and will take the form of a building 200 feet by 80 feet in the modern style, advantageously situated between the French Section and the Amusement Park. The building will be constructed of steel and reinforced concrete, with special soft roof lighting.

The entire decoration, which is on a most lavish scale, is being prepared at the Canadian Government Exhibition warehouse at Hampstead, and consists of continuous transparent frieze, nearly 500 feet long, with a special illuminated background portraying Canada's productive resources from Atlantic to Pacific. Visitors will be able to take in at a bird's eye glance the products and methods of Canada's farms, fisheries, mines, forests, factories and mills.

All advertising matter will be published in French, Flemish and English, and all efforts will be centred on presenting Canada as a composite whole and not by individual provinces.

All Accredited Stock

Great Demand At Vergreville Hatcheries For Baby Chicks

Ninety thousand baby chicks were sold from the Alberta Hatcheries, Ltd., at Vergreville this year, all of them from eggs selected from accredited flocks. This enterprise was started on capital supplied by about twenty local men and is a purely commercial hatchery. In addition to this they brought in baby chicks from British Columbia to fill orders they were not in a position to supply. The capacity of the hatcheries is greater than the 90,000 produced this year and with the perfecting of one of their incubators, a home-made product with a 100,000 egg capacity, and the development of their markets, it is probable that the business will develop greatly during the next season.

At present in addition to the 100,000-egg incubator, there is also a 15,000-egg electric incubator. Will J. Gould is operator and manager and the district agriculturist F. H. Newcombe has been an active agent from the beginning of the enterprise.

The scheme started as a result of dissatisfaction over the different standards in judging birds and an increasing feeling that the poultry business should be raised to a more business-like proposition having its proper place in farm activities. This could not be done until farm flocks were increased in number and improved in quality. There was little incentive to do this with a standard of perfection as one objective and standard of production as a counter objective or basis.

"Do people often fall down this abyss, guide?"
"No, sir, never more than once."—Lustige Kolner Zeitung, Cologne.

A TONIC

A tonic means giving tone and vigor to the system; giving or increasing strength.

"When everything goes wrong and we are blue; when obstacles surround us and discouragement sets in, we yearn for sympathy—but that is not what we need. We need a tonic either actual or metaphysical—perhaps both."

Of the latter kind here is one that should make us snap out of our depression and get back upon our feet. We quote from "Electrical Merchandising":

"One of the big open tournaments was played upon a course which had fairways of velvet and roughs like the middle of a tamarac swamp. All of the contestants in the tournament were kidding excepting Hagen and Bobby Jones."

"What do you think of these Gehen-nie roughs, Bobby?" they asked Jones.

"As fair for one as for the other," responded Bobby.

"And what do you think, Walter—what's your opinion of these roughs?" "What roughs?" responded Hagen.

"The next time you are blue, and you think you have all the troubles in the world, and you think you are not getting your fair share of business, remember the other fellow has his troubles, too."

The "fairways and roughs" of life are the same for one as another and whether you are a success or not depends how you tackle the job in hand. Just do the very best you can, and you can't do any more.

The courts of the province are stressing the fact that automobile drivers must carry their drivers license on their person.

Many are at present attaching this license, in a suitable holder, to many parts of the car. This is not a safe method as it may be stolen and does not meet the purposes of the Act.

While much leniency has been given while this Act was being brought into force, it cannot be expected to last forever and a few precautions should be taken. The first is to carry your driving license on your person.

DID YOU EVER STOP TO THINK?

Just what a ten dollar bill which a farmer spends in his home town may accomplish. Let us follow it around. Probably the dry goods merchant gets it first. He passes it on to the hardware merchant in payment of an account. The hardware merchant pays it in wages to one of his employees. This employee pays it to his landlady, who pays a grocery bill with it. The grocer can then pay his butcher. The butcher passes this on to the produce merchant, and this produce merchant, buying largely from the farmer, passes this ten dollars back to the farmer, from which it originally came. Thus, it has, in all its ramblings among the home town people, served many useful purposes and yet it is still in the community ready to serve again.

If sent away to distant merchants that ten dollar bill is gone for good. It may serve to build up a large city elsewhere, but so far as the home community is concerned it has been drained of just that much working capital.

LOCAL & GENERAL

Mr. Harold Tonjum is a business visitor to Herbert, Sask., this week.

A few Didsburyites attended the first Rugby game of the season at Olds on Saturday.

Mr. and Mrs. H. W. Chambers motored to Okotoks on Sunday to visit with relatives.

Miss MacKenzie of the local high school staff spent the week end in Calgary.

Messrs. A. A. Reeves and Geo. Hawkes spent Saturday around Lacombe hunting ducks.

Dance in the Lone Pine Hall under the auspices of the Hall Board, Friday, October 4. Bellamy Orchestra.

Mr. and Mrs. Ward Keith and Mr. and Mrs. Hugh Lee motored to the Ghost River Dam and Turner Valley on Sunday.

Mr. and Mrs. Harold Clemens of Calgary were visitors to Didsbury for a few days this week. Harold is now employed with the Motor Supply Co. of Canada.

A new and golden name! Maurice Chevalier—the idol of Paris—the sensation of America—in "Innocents of Paris." Meet him at the movies, Didsbury, Saturday, September 28; 7:30 & 9:30. You'll want to see him more!

Mrs. J. Boorman and daughter Betty were visitors to Olds on Saturday at the home of Mrs. Boorman's parents, Mr. and Mrs. W. Stock. Mrs. Stock is slowly recovering from her accident which occurred this summer.

WHAT OTHER EDITORS ARE SAYING**PUBLIC OWNERSHIP**

While the Advocate regrets that so many municipalities are passing over their public utilities to the Calgary Power Co. and other public companies, yet it does not hold the municipalities so much responsible therefore as the Government and legislators of the Province. The Province should have taken control of the manufacturing and wholesale supply and left the municipalities to look after the local distribution. As it is now, the Province will either have to buy out the Calgary Power Co. some time and pay far more for its properties than it need have done had it installed the power construction itself, or abandon the power field entirely to private capital, with the telephones to be sold out also. There may be reasons for want of action on these lines by the Alberta Government, but the Advocate believes that the administration has not sufficiently realized the rapid advances and the grip that private capital is getting on the public utilities of the province, and has not been seized of its duty to protect provincial and municipal utility interests from private aggression.

According to a recent statement of the treasurer of the Ontario Government, private interests would readily pay 500 millions, or a sum large enough to liquidate the entire debt of the Province of Ontario, for the provincial hydro system of that province, which is valued at cost by the Hydro-Electric Power Commission at 152 millions.—Red Deer Advocate.

ANNUAL MEETING

—OF THE—

Didsbury Agricultural Society**Mon., Sept. 30**

—AT 1:30 p.m.—

In Berscht's Hall

All members of the Society are requested to be present.

Thousands Of Miles Of Roads Marked By A.M.A. Officials

Marking of highways, both main and secondary, is being largely extended in this province through the activities of the Alberta Motor Association. Both in the north and the south, the work is being conducted by officials of the A.M.A. and good results obtained thus far. The program will be continued during the fall and again next spring, which will mean that thousands of miles will be marked to the joy of all motorists.

A warning is issued by the government to all threshmen who are operating threshing machines including the combine, without a license. Whether or not the operator is doing custom or personal threshing, all must be in possession of a license, the cost of which is one dollar. Attend to this matter if you have not already done so. It may save future worries.

After all, a stable government only requires horse sense.

THE FORD CAR STEEL SPOKE WHEELS

Close up view showing how Ford Specified Tire fits into drop center rim.

Greater Strength and Durability

THE Ford Steel Spoke (Drop Centre)

wheel is an advanced step in engineering and the result of exhaustive experimental tests. It is smart in appearance, extra strong, having a lasting finish, easy to clean and provides a simple method for mounting and demounting the tire without tools and in a fraction of the time previously required.

The steel rods or spokes, 1/4" in diameter, are electrically welded to rim and hub shell. The finish is enamel baked on steel. Possessing great resiliency and being one solid piece, these wheels have a sturdiness not approached by any other type.

The Ford wheel eliminates loose, squeaking spokes and rims, pinched tubes, chipped or peeling finish, necessity of tire flap, misalignment of tires due to carelessly mounted rims, and a host of other wheel and tire ills formerly encountered. It permits of easy steering and no drumming sound is created by the wind.

There is an enormous amount of careful work necessary to build strength and service into the Ford Steel Spoke wheel, and the results justify the engineering study and skill devoted to this feature of the Ford car.

Drive it Yourself—there is no Better Test

Ford Car Features

- Choice of colors
- 55 to 65 miles an hour
- 40-horse power engine
- Fold down tires
- Fully enclosed steering system
- 4 Hydraulic shock absorbers
- 50 to 60 miles per gallon of gasoline
- Shatterproof glass windshield
- Their proof ignition lock
- Reliability and low upkeep

WORLD HAPPENINGS BRIEFLY TOLD

Regina was named as the scene of the 1930 convention of the Trades and Labor Congress of Canada. The western city defeated Hamilton by 109 to 75 for the honor.

Mrs. Jessie Campbell Ewart, wife of John S. Ewart, K.C., widely known authority on constitutional law and history, died at her Ottawa residence recently.

Montreal proper has now a population of 1,071,057, according to Lovell's Montreal Directory, the 87th volume of which is about to be published. The population of Greater Montreal is 1,224,059.

Vilhjalmur Stefansson, famous Arctic explorer declares that the northern air route to Europe is the only practical one to develop and predicts that within 10 years' time there will be one day mail service from Winnipeg to London over the northern end of the world.

The Graf Zeppelin completed its 20,000 mile flight around the world in 21 days 7 hours and 34 minutes elapsed time. Actually flying time of the Graf was 11 days 23 hours and 14 minutes, beating the time of 15 days and six hours made by the United States army world flyers in 1924.

IS THERE A BABY IN YOUR HOME

Is there a baby or young children in your home? If there is you should not be without a box of Baby's Own Tablets. Childhood ailments come quickly and means should always be at hand to promptly fight them. Baby's Own Tablets are the ideal home remedy. They regulate the bowels; sweeten the stomach; banish constipation and indigestion; break up colds and simple fevers—in fact they relieve all the minor ills of little ones. Concerning them Mrs. Mollie Cabotte, Makamik, Que., writes: "Baby's Own Tablets are the best remedy in the world for little ones. My baby suffered terribly from indigestion and vomiting, but the Tablets soon set her right and now she is in perfect health." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Great Mathematician

Professors Amazed By Rapid Mental Calculation Of Young Russian Woman

The world's most marvellous woman mathematician has been discovered in the person of Nina Glagoliva, 22 years old, who does in her mind, in from two to 20 seconds, mathematical problems which require hours of experts to do, in the ordinary way, with pencil and paper.

This wonder woman has been discovered after a wide survey, and scientists are amazed at her lightning-like mental calculations. Before a commission consisting of Professor Kozevnikoff and Professor Chljevsky, mathematicians; Kojinsky, the engineer, and Dr. Kiseleff, a physician, Miss Glagoliva with apparently little effort, extracted the root in the ninth degree of numbers with as many as 20 digits. Squaring and cubing numbers of 9 or 10 digits seemed no harder to her than the multiplication table to ordinary humans.

Her memory is remarkable and she can repeat, having heard them only once, long lists of words in languages she does not know. The commission pronounce this woman of Russian birth, greater than Arago or other prodigies on record.

UNIQUE SPORTS TYPE

It's slender, trim and wearable. It rather suggests wrapped treatment, so entirely smart and new. Style No. 560 is a boon to the woman with a stout figure. It conceals overweight without a tell-tale. Just see how the surprise closing bodice with shawl collar carries the line down to straight closing of skirt to give the figure length. At each side of front, inverted plaits add necessary width to hem. They are topped by pointed patch pockets with envelope flaps. The back is perfectly straight. It is a model that adapts itself beautifully to all the smart cotton fabrics as printed pique in red and white pin dots with white pique contrast as sketched. Yellow sportswear linen, peach shantung with white, green and white checked gingham with green organdie, sky-blue silk broadcloth self-trimmed, orchid and white gingham check in cotton voile with white organdie and shell-pink washable flat silk crepe. It is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust measure. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

IT'S folly to suffer long from neuritis, neuralgia, or headaches when relief is swift and sure, thanks to Aspirin. For 28 years the medical profession has recommended it. It does not affect the heart. Take it for colds, rheumatism, sciatica, lumbago. Gargle it for a sore throat or tonsillitis. Proven directions for its many uses, in every package. Every drug store today has genuine Aspirin which is readily identified by the name on the box and the Bayer cross on every tablet.

Aviators Had Hard Time

Had Almost Lost Hope When Rescued In Far North

After living eight days on berries between God's Lake and Norway House, where they made a forced landing, R. Marshall and S. Harrison, Canadian Air Force aviators, are now recovering at Norway House. They were rescued by an air force plane recently when they had almost given up hope.

Their clothing was in tatters and they were painfully weak when found. They were on fire patrol when the motor stalled and landed on the lake, and struggled unsuccessfully the first day in an effort to make repairs. They remained near the machine and on the eighth day their frantic signals attracted another plane to their rescue.

Like a Grip At the Throat. For a disease that is not classed as fatal there is probably none which causes more terrible suffering than asthma. Sleep is impossible, the sufferer becomes exhausted and finally, though the attack passes, is left in unceasing dread of its return. Dr. J. D. Kellogg's Asthma Remedy is a wonderful remedial agent. It immediately relieves the restricted air passages as thousands can testify. It is sold by dealers everywhere.

Army Fights Locusts

Sixty-Five Tons Destroyed By People In Bulgaria

Every man and woman between the ages of 16 and 80 was recently mobilized by the government of Bulgaria to fight an extraordinary plague of locusts which were destroying crops in the Hasovo District, of southern Bulgaria. Fire, smoke, lye and oil were successfully used in combating the pests, but more than 65 tons of the locusts were destroyed before their depredations were finally terminated.

Sores Flee Before It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Electric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

France has seven million cyclists. It is the most popular sport in that country. An annual distance bike race is one of the big sporting events each year.

Investigating New Marketing System

May Market Wheat In Europe On Basis Of Protein Content

Dr. Robert Newton, professor of field crops at the University of Alberta, has been asked by the National Research Council of Canada to make an investigation of the possible reception which would be given in Europe to a system of marketing wheat on a basis of protein content. The report will be prepared for the next session of parliament.

Suggestion that such an investigation be undertaken was made by the agricultural committee of the House of Commons last session. The announcement that the work would be done by Dr. Newton, was made by Dr. H. M. Tory, at a session of a committee of the research council here.

The report of grading of wheat by protein content, published by the research council for the committee, was approved.

Might Be Good Idea

Everyone In Japan Compelled To Carry Identification Disc

"Where's your identification disc?" In the near future you may be stopped by a policeman and asked this question. And if you can't produce the disc, it may mean a police court summons and a fine, says a writer in Answers. This may sound far-fetched, but a coroner remarked the other day that it would be a good thing if everybody carried an identification disc of some kind, and was informed by a police officer that this was compulsory in Japan. There everyone wears such a disc around the neck from birth onwards. Apart from the convenience in accident cases, it would also be a safeguard against loss of memory, of which there have been many instances.

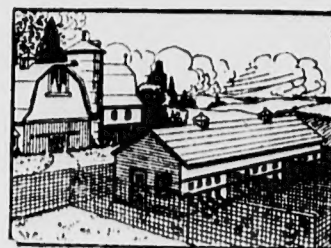

Martha—I thought you told me that you wouldn't give away that secret I told you last night.

Madge—I didn't give it away. I exchanged it for another one and an ice cream soda.

Keep Your Farm Up-to-Date This Inexpensive Way

For Farm Homes

Faded or cracked walls and ceilings detract from the pleasure of farm life. Hundreds of farm owners, realizing this, have transformed their rooms into bright, colorful interiors by applying Gyproc over all the old, ugly surfaces—then decorating. Remarkably attractive results are thus achieved at small cost. Every room becomes much more beautiful, livable and up-to-date.

Utilizing Waste Space

Those musty, inaccessible waste spaces in your attic and basement! Why not convert them into extra rooms by erecting Gyproc walls and ceilings? You can have a playroom, a laundry room, a workshop, a special preserving closet or any other kind of room you wish.

For fast, economical, fire-proof construction on the farm there is nothing to equal Gyproc. Write us for information or see your nearest Gyproc dealer.

CANADA GYPSUM AND ALABASTINE, LIMITED

Head Office: Paris, Canada

GYPROC
Fireproof Wallboard

Silver Dollar Out Of Date

Fifty Million In U.S. Treasury But No Demand For Them

The silver dollar has joined the horse and buggy and other remnants of the past and has faded from circulation, while the silver half-dollar is still used in the West, but is going out of use in the East, because quarters are favored for tipping, according to U.S. Treasury officials.

At the present time there are about 50,000,000 silver dollars tied up in the Treasury to back up silver certificates, although they could easily be placed in circulation if there were a demand for them.

FREE BABY BOOKS

Write The Borden Co., Limited, Dept. B-43, 140 St. Paul Street W., Montreal for two Baby Welfare Books.

Barns and Poultry Houses

Gyproc lined barns and poultry houses provide the best protection against fire, cold, heat and vermin that your stock can have. You can erect strong, rigid Gyproc sheets yourself in short time and at little expense. After a few months you will be delighted with the improved health of your cattle and the increased laying capacity of your flock.

More cups to the pound, more flavor in the cup, more tang to the taste. That's what makes Red Rose Tea so popular. Every package guaranteed.

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, the singing waiter and song writer at Blackie Joe's New York night club, is discovered by Marcus, the famous Broadway revue producer. Al insists on helping Molly, the ballad singer at Blackie's, because he loves her. Molly marries him, not loving him, and he pulls her up the ladder of fame. Meanwhile, Grace, the cigarette girl at Blackie's, who loved Al without his knowing it, is left behind. Molly discovers she is to have a baby. She resents this at first, but is reconciled after little Junior arrives. But when she returns to the stage she loses interest in the child. Her romantic interest in John Perry, Al's best friend, is revived and one day Grace sees them riding in Molly's limousine. She also sees the man put his arm possessively about Molly.

CHAPTER XII.

Night on Broadway. The richly dressed limousine crowds had left the theatres and were pouring into the fashionable night clubs. The electric signs on the night clubs blinked, beamed and beckoned. "Here," they seemed to say, "you may find succor from care, here you may eat, drink and be merry until dawn—if you have the price!"

Brightest among those insidiously beckoning lights was the brilliant sign of the CLUB BOMBO, where Al Stone was part owner and master of ceremonies. What a contrast to the shabby old place where he had once worked—Blackie Joe's. Al often thought of it. And what a contrast between the job he now held and his old one. Once he had been a mere singing waiter, eager for the tips that the none too affluent patrons of Blackie's place threw him when they happened to like his comic songs and his ad lib wise-cracking. Now he was using his fame as Broadway's foremost song writer to pull the shekels into his pocket at the Club Bombo. He was the magnet, the favorite of the big-time crowds. They called him the "Singing Fool" because he could put his songs over with such emotional intensity.

The ballroom of Al's club was expensive and expansive, designed to hold the huge crowds that flocked there. The tables spread across the room an army of round white tops, with a small cleared space in the middle for the cabaret performers and for dancing. One of the best jazz orchestras in the land furnished music from a raised platform at one side.

Now as Al walked slowly up and down near the doorway, greeting new arrivals, the jazz boys were

sending out their plaintive, seductive strains and the floor was crowded with dancers.

The music died away, like a haunting cry echoing down a ravine, the lights went out and the couples left the floor. Then the spotlight picked up Al alone on the dance floor, and a roar of applause greeted him. He smiled happily and shook hands with himself—a symbolic gesture indicating that he was shaking hands with everyone.

"Ladies and gentlemen" — his voice came clear and resonant — "we're all here and I want you to have a good time. Forget the covert charge and be happy. But before the show starts I want you to know a few of the celebrities we have present. Here's Dolores Costello, the famous motion picture star; there's Jack Barrymore, who needs no bush. At the right you will see Mayor Walker of our great city."

Finally Al's glance rested on a vacant table that was rather conspicuously placed. This was the special table that he always kept the reserved sign on, the table belonging to Molly and himself. Now he saw a couple stop before it and plead with the head-waiter to let them have it. He moved across the room quickly.

"Sorry, folks," he said, with polite regret, "but this table is always reserved. We'll find you one just as good—don't worry. Herman, see that the lady and gentleman are well seated."

Al gave the waiter a friendly clap on the shoulder and turned away. But when the couple had gone he glanced back toward the table, gazing at it with tender speculation. This was Molly's table and, in a moment, she would be here to occupy it. It must be held inviolate.

This table was somewhat different from the others; it was more tastefully arranged and the flowers on it had been specially selected and placed by Al himself. He was not quite satisfied with them, so he began to rearrange them forgetting his crowd entirely. Then he produced a jeweler's box from his inside coat pocket and slipped it under Molly's napkin. Attached to it was a card which read—"To my darling wife—on her anniversary and mine."

This done, Al looked up, smiling happily, and glanced at his watch. She should be here by now.

At that moment Molly and John Perry were comfortably ensconced in her blue limousine, proceeding with purposeful slowness toward the Club Bombo. Molly had told the chauffeur not to hurry.

She sat leaning against Perry's strong shoulder, while they conversed intimately in whispers. Perry was pleading, but Molly shook her head, although undecidedly.

"John, it's too complicated for me to solve. I love you, but—"

"But what?"

"Well, think of my position. Here I am, with all the money I can spend and all the public applause my nature craves. I'm sitting pretty, you can't deny that."

"I know all that. I've heard it a thousand times. But there's one thing you haven't got and that's important. You have no husband to love you whom you happen to love. Think it over."

Molly stared soberly straight before her, twining and untwining her small, white-gloved fingers.

"Are you falling in love with Al?" whispered the racketeer, bantering and sarcastically. "Do you like him more than me?"

Molly shrugged her shoulders impatiently. "We won't go into that—you know the truth. The point is, Al has put me over. I wouldn't be famous if it wasn't for him. I'm no sap—I know that. That's why I've stuck to him so long. If I quit him he'll turn on me and where will I be? Just a girl who will drift back into the unknown."

"Nonsense, Molly!" exclaimed Perry. "You're a star in your own right. Besides, is fame everything? Doesn't love count for something?"

"You bet it does!" cried Molly vehemently, and almost bitterly. "If I didn't think so I would never have let you come near me."

John Perry smiled. He knew the cool, calculating, ambitious Molly was mad about him. But he was mad about her, too. At first his interest had been the lightest of heart affairs, for he was a born philanderer, but gradually the situation had changed. To his own amazement a longing for Molly possessed him; now he found himself willing to dare anything to get her.

Suddenly she turned to him and said gravely, "What about my baby—what about Junior?"

But Perry had no answer to that; he merely shrugged his shoulders. He wanted Molly to himself, without any entanglements. Molly gave a tired smile and fixed her gaze on the broad back of the chauffeur, just ahead. How much did that man know of her interest in John?

Her unspoken words were cut short as Perry's arm went around her, and she felt herself drawn relentlessly toward him. In the dark compartment of the limousine her lips were pressed hard against his mouth; his arms were around her like a vise. She forgot Al and Junior, forgot her ambitions, forgot everything but the passionate embrace of the man who held her. She relaxed for a thrilling moment and smiled into the eyes only a few inches from her own. Then she pulled herself abruptly away, for the car was approaching the Club Bombo!

She quickly snatched a jeweled compact from her tiny bag, gazed at herself in the mirror, patted her disarranged hair back into shape. Her rouged lips had been smeared, so she seized Perry's handkerchief, gently wiping off the excess rouge. Meanwhile, the racketeer gazed at her in admiration and brushed her face powder from his top-coat lapel. "You've mussed me terribly."

"Sorry," whispered the imperturbable Perry.

The chauffeur swung open the limousine door and Molly stepped out. Straight ahead she saw Al in the night club doorway, smiling at her expectantly.

(To Be Continued.)

The Oil Of the People.—Many oils have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

A Fruitful Cherry Tree

A cherry tree at Salem, Oregon, known to be over 70 years old, has produced 1,157 pounds of cherries this year, bringing a total of \$115.70. The tree is ten feet around the base and the body sound, according to R. E. Shinn, who has been caring for it.

An Amazing Project

Plan To Make Inland Sea In Sahara Is Feasible

Ancient prophecies may be fulfilled if a project declared feasible by engineers is carried out. It involves making a vast inland sea in the Sahara, and that would be accomplished by digging a canal which would begin about twenty-five miles from Biskra and run out to the Gulf of Gabes, in Algeria. It would be 210 yards wide, thirty-nine yards deep 170 miles long. It would connect the eight shots (shallow saline lakes), that exist in that region, and would transform it into a vast interior sea having a surface of 14,000 square miles.

Ex-Kaiser Wilhelm is still the wealthiest German, his estate being estimated at 500,000,000 gold marks, approximately \$119,000,000.

Farm Incomes Higher

Average Increased By Seventy-Five Dollars In Year

The average cash income per farm home in the Provinces of Manitoba, Saskatchewan and Alberta last year was \$2,544, exclusive of the value of seed, feed, meat vegetables and other commodities produced and retailed by the farmer for his own requirements. This is an increase of \$75 per home over the previous year.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain de-

parts. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.

—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of

time they'll stay fresh...delicious! Para-Sani keeps them from staling.

Get Para-Sani in the handy, sanitary knife-edged carton.

ANSWERS TO QUESTIONS ON CITIZENSHIP

Born?
Yes, sir.
Where?
Russia.
Why did you leave Russia?
Because I couldn't take it with me.
Where were your forefathers born?
I only had one father.
Your business?
Rotten.
Where is Washington?
He is dead.
Mr. Cohen, do you promise to support the United States?
How can I with a wife and six kids.
What state are you in?
Trouble.
Now, Mr. Cohen, if the president and vice-president died, who would take charge?
The undertakers.
Who discovered America?
Columbus.
Where is he?
In Ohio.
Where was the Declaration of Independence signed?
At the bottom.
Were you ever convicted of crime?
No, I have a good lawyer.
Do you know why the hand of the Statue of Liberty is 11 inches?
Yes, because if they had made it 12 inches it would have been a foot.
That is all, Mr. Cohen.
When will I get my papers?
They will cost you \$5.00.
Oh, Oh, I knew there was a catch in it somewhere.

Most fruits, except those indigenous to the tropics or sub-tropics, are now grown in British Columbia. Apples, apricots, cherries, peaches, plums, prunes, nectarines, figs, loganberries, raspberries, strawberries, grapes, almonds and other less hardy fruits and nuts are now grown commercially. Apples have been grown for 17 years, rising in volume of production from 220,000 to 3,000,000 bushels.

With 99 arrivals scheduled at the Port of Montreal and Quebec during the 1929 season, the Canadian Pacific sets up a new record for one line sailing its ships via the St. Lawrence route. There will be 74 arrivals and departures at Montreal and 25 at Quebec, the season opening with the arrival on April 26th of the Montclare and the Duchess of York. The latter will be on her maiden voyage of the St. Lawrence. The first arrival at Quebec will be the Empress of Scotland, May 4th, after a winter of cruising in the Mediterranean.

One little pig went to market; and low and behold there were eight little pigs when the shipment arrived. It was a sow, and on route seven little pigs were born. Whether the shipper or the express company should pay the fares of the seven extra and unexpected pigs is a matter that has not been decided yet.

Thirty thousand tons of railway material—trucks and steel framing for box cars—will shortly leave Vancouver for the Orient, as equipment for the Trans-Siberian Railway. The order for this material was placed thirteen years ago, but delivery was halted with the outbreak of the Russian Revolution, and the equipment held in the Canadian Pacific Railway's yards at Coquitlam until conditions for delivery were more favorable.

Drive It...

and let your own experience sell you

NO one who has sat behind the wheel of the New Chevrolet Six could ever be contented with less than the quality . . . less than the performance that this outstanding SIX provides.

For Chevrolet is the lowest priced six in the world with this remarkable combination of fine car features:

Body by Fisher, with deep, richly-upholstered cushions, Fisher VV Windshield, Tarnstedt Fittings, fashionable Duco colorings, smartly beautiful design. Six-cylinder valve-in-head engine, of high-compression non-detonating type, with the extra efficiency of "direct firing" and swifter pick-up due to automatic accelerating pump. New design, ball-bearing steering gear, giving marvelous handling ease. Efficient braking system of non-locking four-wheel brakes and independent emergency brakes. Long semi-elliptic, shock-absorber springs, parallel with the frame. Modern Convenience Features, twin-beam headlights, foot-controlled; high-speed window regulators; indirectly-lighted instrument panel, including electric temperature gauge and theft-proof Electrolock.

And all these, plus the established economy and staunch endurance for which Chevrolet is famous, at the price of a four! Drive it and let your own experience sell you on Chevrolet Six!

IT'S BETTER BECAUSE IT'S CANADIAN

A SCOURGE

Eastern Canada is fighting that scourge of youth, Infantile Paralysis (Acute Polymyositis) and both Ottawa and Toronto have had a large number of cases, the majority of cases being children. Quite a number of deaths have occurred. This is the season for Infantile Paralysis. There have been a few cases in Alberta within the last month. Now that the children have returned to school, there is daily contact, especially in this so in country schools, where during the vacation period children are usually widely separated.

If a child exhibits signs of sickness, i.e., fever, running nose, loss of appetite, irritability when touched, he should be isolated for twenty four hours. In that time whatever disease is incubating will develop. On no account should other children be allowed in contact. The symptoms may develop nothing worse than a bad cold, or it may be measles or scarlet fever, or again it might be Infantile Paralysis. If at the end of twenty-four hours the child is still sick, a doctor is indicated. Where the whole future of the child may be concerned, it is criminal to run the smallest risk.

Further information may be had from the Canadian Red Cross Society, 407 Civic Block, Edmonton, Alta.
